

## iopak ahead of the pack

This brand new IOPAK Slat Belt conveyor is fitted with a modular plastic "Intralox" type belt and is widely used in the BOTTLING or PACKAGING industries. Because of the low friction of Slat Conveyors they are also used in the labelling industry.

An IOPAK rotary accumulating table could be used to feed bottles, containers or cans onto the conveyor, where a sensor can be fitted to position the containers for precise filling.

## SANITARY QUICK RELEASE CONVEYOR
